After checking other cv company's, and there prices. I went with cv shapers, as they were a good value for money. Though they hadn't been recommended by anyone, I went with my Gut feeling. I was very happy I did. As they were very good at finding out what I do in my job and then putting in the cv in a very good way. They were very patient and had excellent listening skills. They also seemed genuine and willing to help. I have recommended them to a friend and I also will recommend them in the future

I received my Curriculum Vitae and Cover Letter on time but took time for linked in since departure of one of the cofounder and finally I received it. My resume before changes with C V shapers was something like I applied for jobs and no reply at all from employers or i am not suitable for a positions. After I done my resume with CV Shapers, I am receiving constructive feedback like my application under review ,considering my application for the position and remaining only some of the reviews like i am not suitable for the position with only 4 out of 100.mostly,I believe positive chances on getting a suitable careers are there and i suggest everyone purchase the job search service with them to avoid delays in job search .I believe you may get faster results from their service since they are professional. I will definitely recommend it to my friends in Malaysia and other westerners friends because most of them looking for opportunity abroad like Dubai, Middle East and South East Asia. For now I am recommending it here in Facebook and I think this organisation provides good value for money compared to other CV professional writing services
